

ParishSOFT Giving: Digital Forms

Effortless Giving, Lasting Impact

ParishSOFT Giving offers a robust giving solution with seamless integrations, helping parishes improve efficiency, connect with parishioners, and increase giving. ParishSOFT Giving features key upgrades, including digital forms and enhanced form functionality, making it a premier choice.

What are Digital Forms?

Simply put, digital forms are online versions of paper forms used to collect information that can be sent electronically to your parish. A digital form with text boxes, buttons, and dropdowns is filled and sent electronically to your parish. It saves time by eliminating manual data transfer, allowing parishioners and administrators to focus on more important tasks.

Create custom forms to meet your parish's specific needs, such as collecting donations, payments, and information and allowing people to register for events, classes, or volunteer opportunities.

Why use Digital Forms?

Digital forms are an asset for ministry. They are easy to use, more efficient and provide instant access to data. You can capture information quickly and accurately, cutting out manual data entry and lowering mistakes. Digital forms provide versatility, simplicity, and automation.

- **Versatile:** Create forms to welcome guests, register for events or classes, submit prayer requests, volunteer sign-ups, surveys, facility rentals, weekly donations, and more! Get creative and publish beautiful forms to fit your parish's unique needs.
- **Simple:** The form builder is easy to use— with customizations, drag-and-drop features, and templates. Use a single-form tool for every area of ministry. All forms can be easily shared on your parish website, via email, text message, social media, and mobile app. Plus, every submission can be auto emailed to whoever you wish.
- **Automation:** Use workflows to save time and better engage your community. Form submissions can trigger communication like a text or email, assign a follow-up task to a team member, add an important note to a profile, and more! Automation can help ensure that no task or person—falls through the cracks.

ParishSOFT Giving: Digital Forms

Effortless Giving, Lasting Impact

Digital Form Features:

- **Impact Report:** In recruiting or fundraising, sharing your purpose is as vital as outlining your methods. By incorporating Impact Reports into your forms, you can provide more insight into the mission and use of funds, encouraging more participation. This donor-facing feature can include visual motivators like progress bars or gift breakdown charts.
- **Produce Unique Tickets for Events:** Need tickets for an event? Ticketing for events is simple and incorporated in our forms. If enabled, registrants get tickets, each with a unique QR code, via confirmation email for quick check-in. They can print it or show it on their smartphone. Lost tickets can be retrieved by staff through comprehensive form responses.
- **Allow Coverage of Processing Fees:** Often, donors are unaware that parishes incur processing fees when accepting electronic donations and that they can opt to cover these costs. Once informed, many are willing to assist with these expenses.
- **Customize Payment Options:** Forms offer diverse payment management options. Donors can pay via credit, debit cards, or e-checks, and event registrants can opt to "pay later" with cash or check. Multiple payment fields cater to various form objectives, like amount buttons for sponsorship's, user amount fields for self-determined contributions, and per-item payment fields for merchandise sales and inventory tracking.
- **Sign-Up Slots:** Use the Sign-Up slots feature to efficiently schedule volunteers for service times or plan potlucks. This tool collects volunteers' contact details, lets them choose their preferred service area and provides event information. As people register, available spots decrease automatically. It can be used for various tasks, from greeting at events to coordinating a potluck.

Abandon the Paper!

Switch to digital forms and change how your parish handles ministry.
