Intelligent Query (IQ)

Elevate engagement in your parish with better data.

ParishSOFT Intelligent Query (IQ) is a user-friendly custom query report builder designed to help the catholic church extract necessary data from ParishSOFT Family Suite. Whether your staff requires a simple report or a more intricate query with multiple data fields, operations, or conditions, IQ simplifies obtaining precise information to support informed decision-making. The custom query builder delivers instant results for Diocesan and Parish planning and targeted communications, offering unlimited ways for staff to analyze live data and demographics without the risk of errors. IQ is easy to use, requiring no knowledge of raw database structures or expensive consultants for setup or maintenance. Exported data is compatible with Word and Excel. Saved queries are dynamically updated and can be shared for recurring use. Integrated with the ParishSOFT Family Suite, IQ allows access to the same records maintained in other ParishSOFT programs, providing the tools needed to retrieve data tailored to parishioners' unique needs and facilitating more informed decision-making.

Enhance Decision Making at your Parish

- Custom queries that are fast and simple make it easy to gather, report on, and share information with teams
- Dynamic results from new and saved queries are always current and reliable, allowing well-informed data analysis and accurate parish demographics
- Email, query import, and global settings provide many ways to share queries for better collaboration

The ParishSOFT Advantage

- Full integration with ParishSOFT Family Suite
- Available 24/7 from any computer or device with internet access
- Automated backups and updates ensure parish records are safe and staff always have the latest tools
- Permission controls to grant access and protect sensitive information where needed

Intelligent Query Integrates with:

- ParishSOFT Giving
- Family Directory
- Religious Education
- Ministry Scheduler
- Offering and Pledges

Increased Productivity: Only From ParishSOFT

- Easy to use — no knowledge of raw database structures or expensive consultants required
- Export capabilities to view results in Excel and Word
- Saved queries update dynamically for unlimited, recurring use
- Direct access to all of your data offers true custom reporting
- Results execute instantly so you can test query variations

Get the Answers You Need

ParishSOFT IQ allows user to combine and compare data to get answers to just about any question you can ask about your records, e.g.,

- Which members ages 15 to 19 have been baptized but have not been confirmed?
- Which families have children in faith formation classes but are not active (or registered) in the parish?
- Which families have children that attended our Vacation Bible School this past summer, but are not active members of the parish?
- Who has stopped participating or making offertory contributions? (A shift in regular patterns may indicate something has happened in the family, and it's an opportunity for the parish to reach out to provide pastoral care.)
