

Newly Enhanced ParishSOFT Platform

Empowering Diocesan Staff for Greater Impact

ParishSOFT is excited to unveil the next generation of its platform, designed specifically to elevate the experience of our diocesan and parish partners. This innovative system offers a remarkable level of convenience, efficiency, and security, all while providing the most advanced and user-friendly tools available. Our goal is to streamline operations and significantly enhance the impact of your ministry.

The newly enhanced platform integrates the ParishSOFT Family Suite of solutions, which includes Giving, Mobile App, and Development Manager, along with two new essential tools: a website building tool and live streaming capabilities. These features are critical for the daily operations of Catholic Churches and for fostering engagement with parishioners. All of this is seamlessly combined into one easy-to-use integrated platform. The improved security measures, a unified user experience, a multi-level organizational view, and single sign-on functionality, ParishSOFT empowers church staff to achieve a new standard of convenience and efficiency.

Looking ahead, we plan to introduce additional modules into the ParishSOFT Platform as they become available, ensuring that our users always have access to the latest tools and resources to support their ministry efforts.

Key Benefits of the Newly Enhanced ParishSOFT

Unified User Experience Across ParishSOFT's Suite of Solutions:

Users can now access all ParishSOFT Family Suite, Mobile App, Giving, Development Manager, Websites and Streaming modules with a single login. This unified platform provides easy access to current and future modules, streamlining your experience.

Single Sign-On Access Across Multiple ParishSOFT Products:

Single sign-on streamlines the user experience by enabling easy access to multiple modules with one set of credentials increasing user satisfaction resulting in higher engagement.

Best in Class Security and Compliance:

Enhanced security measures in ParishSOFT Giving include Multi-Factor Authentication and permission controls for staff. DonorShield™ safeguards parishioner information, eliminates duplicate transactions, and maintains operational continuity during system disruptions.

Universal Menu:

Just like single sign-on, the universal menu simplifies access to ParishSOFT's suite of solutions. Once users login they can reach ParishSOFT modules through one menu with easier navigation and consistencies between applications.

Multi-Level Organization View:

- **Diocesan Multi-Level Organization View:**

The Diocesan Multi-Organization view links organizations through a diocesan/parish structure. It allows diocesan staff to access parish data independently, reducing workload for parish staff while maintaining data integrity.

- **Parish Multi-Level Organization View:**

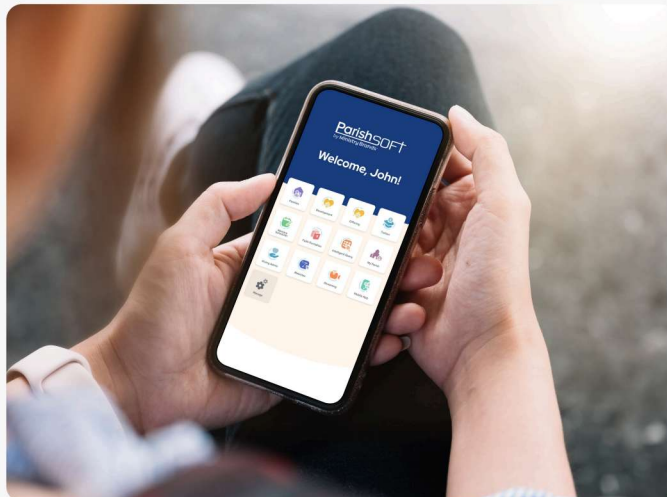

The Multi-Level Organization View in ParishSOFT is a powerful tool designed to support parishes, especially those merging or operating as cluster parishes. This feature enables staff to easily access and manage data from all parishes under the same umbrella while keeping their accounts separate. The Multi-Level Organization View streamlines access to vital information, reducing parish staff workload and ensuring data integrity for a more cohesive and efficient operational environment.

Updated Interface and Design

Upon accessing ParishSOFT, you will immediately experience a fresh new appearance and modernized interface. The welcome screen prominently features modules that closely resemble those found in both Family Suite and Giving, albeit with slight modifications to their titles for clarity.
