

ParishSOFT Giving: Anonymous Giving

A New Way to Give—Quietly and Powerfully

At ParishSOFT, we believe generosity comes in many forms. Some give openly. Others give quietly. With Anonymous Giving, your parish can now embrace both.

Whether giving online, in person, or through the app, donors can choose to keep their gifts anonymous—preserving their privacy while still supporting your mission.

Why Anonymous Giving Matters

Respect for Privacy

Some donors feel called to give, but not to be recognized. Anonymous Giving empowers them to support your parish—without public acknowledgment.

Available Anywhere You Give

Whether through Venmo, Apple Pay, recurring gifts, or cryptocurrency—Anonymous Giving is available across all giving methods.

Simple for Staff

No new workflows. No complicated setup. It's seamlessly built into ParishSOFT Giving with clean reporting and full ChMS integration.

One More Way to Say Yes

Removing barriers means more people feel welcome to give. When donors feel safe and included, generosity thrives.

Built-In Privacy, Built for Ministry

Anonymous Giving includes:

- Admin-controlled toggles and form-level settings
- No names in reports, emails, or giving statements
- Seamless sync with your ParishSOFT church management system
- True anonymity—your donor's privacy is protected at every step

The best gifts often come with no signature. Your impact doesn't need applause to change lives.

Embrace Every Kind of Generosity:

This new feature reflects what makes ParishSOFT Giving different: a ministry-first design that respects every donor's journey. Whether giving is bold or quiet, public or private—every gift matters.
