ParishSOFT Accounting

Financial clarity that strengthens stewardship and supports ministry

Catholic dioceses and parishes are called to steward resources with care, transparency, and accountability. ParishSOFT Accounting is a GAAP-compliant financial management platform built specifically for the Catholic Church. Designed for dioceses, parishes, and schools, it brings accounting, reporting, payroll, and purchasing together in one connected system so ministry leaders can focus on serving their communities.

More than 50 dioceses rely on ParishSOFT Accounting to support strong financial oversight, reduce risk, and provide clear reporting across their organizations.

Accounting Overview

ParishSOFT Accounting delivers web-based fund accounting designed for Catholic organizations. Real-time financial visibility, standardized reporting, and integrated modules help ensure accurate records across parishes, schools, and diocesan offices.

What this means for ministry leaders

- Clear, consistent financial reporting
- Strong internal controls
- Reduced manual work
- Confidence in stewardship decisions

The platform supports a single database across organizations, standardized charts of accounts, and integration with ParishSOFT Family Suite and Giving.

ParishSOFT Accounting Capabilities

General Ledger

Stewardship begins with clear visibility. ParishSOFT General Ledger help dioceses and parishes see where resources are going in real time, ensuring accurate records across ministries and giving leaders the confidence to make sound financial decisions.

New Accounts Payable Automation powered by AvidXchange

When payment processes are manual, staff time is pulled away from mission and visibility can be limited. Accounts Payable Automation, integrated within ParishSOFT Accounting, introduces secure invoice approval and pay approval workflows that streamline how bills are reviewed, authorized, and paid. With clear audit trails, stronger controls, and fewer manual steps, finance teams gain greater confidence in each transaction while reducing administrative effort. The result is more time focused on guiding stewardship, protecting resources, and supporting the ministry you serve.

Accounts Receivable

Healthy ministry depends on knowing what has been received and what is still to come. ParishSOFT Accounts Receivable tracks invoices, payments, and deposits in one place, giving leaders clearer insight into incoming funds and greater confidence in financial planning.

Fixed Assets

Parish and diocesan assets support ministry for generations. ParishSOFT Fixed Assets helps leaders track buildings, equipment, and other resources with accurate reporting, supporting wise planning and long-term care of what has been entrusted to the Church.

Ledger Report Writer

Leaders need clear reports to guide decisions and communicate with confidence. Ledger Report Writer creates customized financial statements directly from your general ledger, providing timely insight while reducing the burden of manual reporting.

New Payroll Powered by APS

Stewarding those who serve the Church should not become an administrative burden. ParishSOFT Accounting Payroll powered by APS aligns payroll, HR, and financial reporting to ensure accurate pay, proper clergy taxation, and reliable compliance. With fewer manual tasks and stronger oversight, parish and diocesan leaders gain confidence in their reporting and more time to focus on their families and the mission.

Consolidation Manager

Diocesan leaders need clear insight across every parish and ministry to guide sound stewardship. Consolidation Manager brings financial data together in one place, providing standardized reporting, stronger oversight, and a diocesan-wide view of financial health so leaders can support their parishes and plan with confidence.

Why the Catholic Church Choose ParishSOFT Accounting

Built for the Catholic Church

Designed specifically for parish, school, and diocesan financial structures.

Real-time visibility

Access financial data anytime from a secure web-based platform.

Stronger financial oversight
