Tuition

Simplify invoices, statements, and reports for parish or school tuition programs.

ParishSOFT Tuition is the ideal web-based program for managing details related to charges for religious education, faith formation, or school tuition in your parish. It offers easy, accurate, and fast invoicing, up-to-date payment tracking, and statements and reports that clearly display payments and outstanding balances by family or fund. Integrated with the Religious Education module and ParishSOFT Family Suite, Tuition utilizes the same family records from your Family Directory program. This integration ensures that when creating tuition invoices, family information is readily available in the database. The program allows for the addition of new families seamlessly. Invoice templates save time by populating default information instantly. With the ability to add unlimited funds and set up templates, ParishSOFT Tuition makes creating invoices efficient. The program's invoice items library enables the cataloging of billable items with details such as description and price. Funds, templates, and invoice items work together to generate consistent, professional-looking invoices, statements, and reports that are always accurate.
